

Online University Diploma - LL.M. Digital Law and Technology

A diploma, taught remotely, full-time or *à la carte* for continuous education

This program is open to graduates who wish to gain a deep understanding of the European legal framework brought in to deal with the issues and challenges of the digital transformation of our economy and society. Students will study four key topics among the six proposed modules: privacy and data protection, intellectual property, contract law, cybercrime and cybersecurity, regulation of the internet applied to the digital economy and artificial intelligence [its ethics and regulation].

KEY OBJECTIVES

- E-privacy: understanding the issues and mastering the principles governing privacy and data protection
- Intellectual property: Mastering the principles of IP and the impact technological innovations have had on these principles
- Contract law and the digital economy : understanding issues specific to contracts concluded over the internet and studying special contracts that have digital products or services as their subject matter
- Artificial Intelligence: understanding the ethics of AI and exploring how the EU is proposing to regulate innovation
- Cybercrime and cybersecurity: understanding the key risks linked to illegal activities online and through digital medias
- Regulation of the internet: understanding the new EU legislation on the regulation of online content and the regulation of platforms

HIGHLIGHTS

- Diploma entirely taught in English
- Exclusively taught online asynchronously through a variety of pedagogical resources
- Regular live online virtual classes to answer students queries
- Online forums moderated weekly by teachers for support
- Compatible with work or other commitments: study in your own time
- Full-time over 12, 18 or 24 months or part-time
- Compatible with continuous education with our *à la carte* menu

CONDITIONS OF ADMISSION

Applicants are required to have an undergraduate law degree or other degree with a dominant legal content or an equivalent international qualification. Exceptionally, we may consider applicants where a comparable academic level has been achieved through other graduate studies and where work or experience has made them a suitable candidate for the LL.M. The Admission Committee will review your credentials and relevant professional experience on a case-by-case basis.
